Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 March 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Applicants cancellation of claims 2, 4, and 6, and amendment of claims 1 and 10, in the paper of 3/17/2004, is acknowledged. Claims 1, 3, 5, and 7-12 are at issue and are present for examination. Applicants' arguments filed on 3/17/2004, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 5 and 7-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The rejection is stated in the previous office action as it applies to previous claims 1-12. In response to this rejection applicants have cancelled claims 2,4,and 6 and amended claims 1 and 10 and traverse the rejection as it applies to the newly amended claims.

Applicants submit that one of skill in the art can identify, without undue effort, polyester polymerase genes or variants, beta ketothiolase genes or variants and

Art Unit: 1652

NADPH-acetoacetyl CoA reductase genes or variants that can be used in the compositions of the invention and that the amendment to claim 1 satisfies the written description requirement and thus the rejection under 112 may be properly withdrawn. Applicants traversal is not found persuasive on the basis that while applicants amendment limiting polyester polymerase genes or variants, beta ketothiolase genes or variants and NADPH-acetoacetyl CoA reductase genes or variants that can be used in the invention helps describe applicants invention, applicants continued reference to a host cell, wherein "a polyhydroxybutanoic acid polymerase gene in the host cell" is not adequately described by applicants specification. Applicants specification at page 1, line 1, and page 3, lines 4 and 12 refer to a host cell, "whose polyhydroxybutanoic acid polymerase gene is disrupted". Thus applicants specification appears to have support for the disruption of "the polyhydroxybutanoic acid polymerase gene" in a host cell, not "a polyhydroxybutanoic acid polymerase gene", which might suggest multiple polyhydroxybutanoic acid polymerase genes.

Applicant is referred to the revised guidelines concerning compliance with the written description requirement of U.S.C. 112, first paragraph, published in the Official Gazette and also available at www.uspto.gov.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
